

SJTU *International Summer Session*

**Traditional and
2016 | Modern China**

The Introduction of Shanghai Jiao Tong University

Established in 1896 as Nan Yang College, Shanghai Jiao Tong University is inherently international. Today with the surging globalization encompassing every aspect of human life, SJTU has set forth the aim of building a world-class university by 2020.

Global strategy therefore stands as one of the major initiatives of Shanghai Jiao Tong University and plays a crucial role on its path towards a world-class university. We value our partnerships with over 100 institutions around the world. We continue to increase our students' overseas experience as well as the international diversity of our student body. Meanwhile, the university will appeal to more talented students around the globe, which is in line with the local and national development strategies.

The summer session has been introduced, to accommodate more international students and faculty members, adding diversity to the campus culture. Alignment with coursera makes it possible for SJTU to disseminate knowledge globally in a quicker and more popular manner, resulting in improvement of its global reputation.

SJTU welcomes international and Chinese students to join the summer program in Shanghai and pursue knowledge but more importantly to learn the thrill of discovery as they delve into the courses on Chinese culture and participate in various activities throughout Shanghai and China.

The Introduction of SJTU International Summer Session

SJTU International Summer Session

To know more about China, including its culture, history, politics and the latest technological development. Would you like to explore a summer in China's most vibrant city and in one of the most innovative and diverse universities in China? Want to develop a new mode of insight and enhance your learning skills by working together with not only Chinese students, but students from all over the world? Look no further than SJTU's International Summer Session!

International Summer Session is a 3-week credit program taught in English for International and Chinese students. The theme is "Traditional and Modern China". Under this theme, there are ten colleges and schools from SJTU to offer 11 packages in a great variety of areas including Chinese Government and Politics, Chinese Law and Society, Investigation and Conservation of Architectural Heritage in China, Exploration of Chinese Landscape and Gardening and etc.

Apart from that, we also provide Chinese language courses for beginners and intermediate learners. During the weekends, there will be extracurricular activities offered, such as Chinese culture experience and city exploration.

Students will be able to select one out of the 11 following packages, Chinese language course, and weekend activities.

Traditional and Modern China

Basic Information

Theme	Traditional and Modern China
Duration	July 4 till July 24, 2016 (* May 12 till Aug.16, 2016 especially for UM Joint Institute)
Application Deadline	Apr.30, 2016
Credit	2 credits for each package; 1 credit for Chinese language course.
Fees	Application Fee: RMB 400 (Approx. USD 63) Tuition: RMB 9000 (Approx. USD 1, 412) * It is not applicable to UM Joint Institute Summer Program.)

How to Apply

Eligibilities

A. Students from Hongkong, Taiwan, Macao and abroad must be enrolled as undergraduates or graduate students prior to applying for this program.

B. Students of non-English speaking countries should provide English language proficiency certificate, IELTS no less than 6.0, and TOEFL no less than 90 points. If you are taking full English taught programs, please provide relevant certificates.

C. Other prerequisites required by each package ("Details for each package, please refer to the following website. http://isc.sjtu.edu.cn/EN/news.aspx?info_id=41&flag=2)

Transcript

An official transcript from Shanghai Jiao Tong University will be sent to the students before October, 2016. Credit obtained at summer session shall be awarded at the discretion of each student's home university. We strongly encourage you to confirm with your home university before applying. If you need further information of the packages, please feel free to contact us.

Online Application

A. Applicants from University-Wide Exchange Partners

Exchange partners of SJTU can nominate students to participate in SJTU's 2016 International Summer Session based on the placement balance of Academic Year 2015 - 2016

1. Application fee and tuition fee are waived.
2. Students can select one package across the program.

B. Applicants from School-Wide Exchange Partners

Exchange partners can nominate students to participate in SJTU's 2016 International Summer Session based on the placement balance of Academic Year 2015 - 2016

1. Application fee and tuition fee are waived.
2. Students are limited to select one package within the relevant schools and colleges.
3. If students want to choose one package outside the corresponding schools and colleges, they need to pay for the application and tuition fees.

C. Free Movers

Applicants can select one package across the program. Tuition fee and application fee please refer to the section of fees.

Please apply through the following website: <http://apply.sjtu.edu.cn>

Accommodation

SJTU International Summer Session will be conducted mainly at two campuses: Xuhui and Minhang. Students are able to choose the on-campus accommodation based on the location of school/college. For instance, the School of International and Public Affairs is located at Xuhui Campus, then the students choosing its package can only apply accommodation at Xuhui Campus.

Room reservation should be made online at dorm.sjtu.edu.cn in June upon receiving the Admission Notice. The accommodation fee should be paid online and is non-refundable. Applicants who successfully book the reservation can check-in as early as July 1st 2016 and check out as late as July 27 before 12 pm.

More detailed information regarding the accommodation reservation will be released once you have been admitted to SJTU International Summer Session.

Xuhui Campus

Double Room: RMB 65 - 80/day
Single Room: RMB 130 - 150/day

Minhang Campus

Double Room: RMB 50 - 60 /day3
Single Room: RMB 80 - 110 /day

Chinese Language Course

There are two levels: Elementary and Intermediate Level. Each student choosing this course is required to take a placement test on the registration day.

Airport Pickup Service

We can provide fee-paying transportation from Shanghai-Hongqiao International Airport or Shanghai Pudong International Airport to SJTU Xuhui or Minhang campus. Details for airport pickup can be arranged after admittance to the program.

Insurance

Students who plan to attend this program should have obtained insurance before they come to study in China. Each student needs to present the insurance certificate to the administrative staff at the registration date.

Visa

SJTU will provide the student visa application form (JW 202 form). The applicant can bring the visa paper, Admission Notice and a valid passport to the Chinese embassy or consulate to apply for a short term student visa (usually the visa type "X 2"). Those who are already in China need to submit a copy of the visa page together with other application documents.

The JW 202 form and the admission notice will be sent to the applicant by the international courier within two weeks after admittance to the program.

Chinese Cultural Experience on 9th July, 2016

Extracurricular Activities

During the weekends, there will be 4 extracurricular activities offered in the first two weeks. Each week, there will be 2 trips. Students can choose one trip on the fixed date. Price for each trip varies from USD 30 till USD 100. Detailed information will provide later.

Meditation

Trip A

Students participating in this program will spend one day visiting an ancient temple in China and will gain valuable insights in to the world of meditation.

Pottery Making

Trip B

Students attending this activity will get a better understanding of the art and history of Chinese pottery.

City Exploration on 16th July, 2016

Trip C

Suzhou Garden Visit

This one day trip in Suzhou includes visiting the famous gardens of Suzhou and to a famous local restaurant.

Trip D

Zhujiajiao Town Visit

Students joining this one day trip activity will get the chance to see more than 10,000 houses built in Ming and Qing dynasties, walk on the ancient streets paved with stones and explore a canal town, an amazing place which is often compared to Venice in Italy.

SJTU International Summer Session 2016

Content

Package 1 Investigation and Conservation of Architectural Heritage in China

Package 2 Big Data Storage and Management.

Package 3 Fundamentals and Advances of Renewable Energy Generation and smart grid

Package 4 Smart Manufacturing and Robotics

Package 5 Fundamentals and Design of Refrigeration system and heat exchanger

Package 6 Chinese Landscape Architecture Studies

Package 7 China's Politics and Global Governance

Package 8 Modern Chinese Studies: Shanghai as Eyewitness of China's Development

Package 9 Advanced Molecular Geomicrobiology: Exploring Theories and Techniques Essential to Understanding Microbial Ecology

Package 10 Chinese Law and Society

Package 11 UM-SJTU Joint Institute Summer Program

Package 1 Investigation and Conservation of Architectural Heritage in China

School of Naval Architecture, Ocean & Civil Engineering

Introduction

The package aims to offer special, in-depth short-term courses and lectures taught jointly by recognized Chinese and European experts, focusing on training students to participate in architectural heritage projects. In addition to courses and lectures, and relying on a large number of architectural heritage restoration projects, this package will also provide ample internship opportunities, organize field trips and select case studies to enable students to combine theoretical research and applications of engineering technology.

Instructors

Giorgio Gianighian / Professor

Prof. Giorgio Gianighian works for Università Iuav di Venezia, Italy as Deputy Vice-Chancellor for International Affairs and Full Professor of Restoration in the Dipartimento di Progettazione e Pianificazione in Ambienti Complessi.

Stefano Bertocci / Professor

Prof. Stefano Bertocci is a Full Professor at the Department of Architecture, Università degli Studi di Firenze (Unifi). His research interest mainly lies on the application of technology-aided methodologies for cultural heritages in terms of surveying, analyses, visualization and database structuring, etc.

Yongkang CAO / Associate Professor

Yongkang Cao is the Director of the International Center for Architectural Heritage Conservation at SJTU. He is mainly involved in research and practice on architectural heritage conservation.

Program Contacts:

Yongkang CAO
ykcao@sju.edu.cn

Qi LU
qilu@sju.edu.cn

Wenjun MA / Associate Professor

Wenjun Ma serves as a Deputy Director of the Department of Architecture at SJTU. He is mainly engaged in research on city marketing and urban development planning.

Wenbing FAN / Associate Professor

Wenbing Fan is the Deputy Director of the Department of Architecture at SJTU. He is mainly engaged in research on Chinese contemporary native architectural design theory and practice.

Package 2 Big Data Storage and Management

School of Electronic Information and Electrical Engineering

Introduction

This package provides a comprehensive understanding of the varied storage infrastructure components in classic and virtual environments. Its goal is to enable participants to make informed decisions in an increasingly complex IT environment. The package provides a strong understanding of underlying storage technologies and prepares participants for advanced concepts, technologies, and products. Participants will learn about the architectures, features, and benefits of intelligent storage systems; storage networking technologies such as FC SAN, IP SAN, NAS, and object-based and unified storage; business continuity solutions such as backup and replication; the increasingly critical area of information security and management, and the emerging field of Cloud computing.

Instructors

Chentao Wu / Associate Professor

Dr. Wu received his dual PhD degrees in electrical and computer engineering from Virginia Commonwealth University in 2012 and in computer science from Huazhong University of Science and Technology in 2010, respectively. His research interests include computer architecture and data storage systems.

Program Contacts:

Head: Linpeng HUANG
Email: Lphuang@sju.edu.cn

Coordinator: Yun CHEN
Email: chenyun@sju.edu.cn

Package 3 Fundamentals and Advances in Renewable Energy Generation and Smart Grid

School of Electronic Information and Electrical Engineering

Introduction

To address the fundamentals, key technical issues and advances of smart grid renewable energy system, this package integrates three interesting topics of electrical engineering: 1) solar and wind power generation 2) power quality treatment and 3) smart distribution/transmission system. The teaching of each topic will be problem-driven, and will focus on the key knowledge and experience obtained from practical smart grid projects in China. The advanced R&D infrastructure established in SJTU will provide the technical support during teaching. This course is open to undergraduate students with background in both electrical and control engineering.

Power Quality Treatment

This topic will focus on the fundamentals of power quality issues existing in the micro-grid and smart grids. Several solution methods will be introduced.

Smart Transmission/Distribution System

This topic will focus on HVDC transmission system and active distribution network. The introduction on hybrid AC/DC power will also be included.

Instructors

Miao ZHU / Distinguished Research Fellow

Dr. Zhu received his B.Sc. degree from Southeast University in 2001 and his PhD degree from Nanyang Technological University, Singapore in 2009, both in electrical engineering. His present research interests include hybrid AC/DC power conversion, power quality and micro-grid.

Program Contacts:

Research Prof: Miao ZHU | Dept. of Electrical Engineering, SEIEE,
Email:miaozhu@sjtu.edu.cn | Shanghai Jiao Tong University, China 200240

Package 4 Smart Manufacturing and Robotics

School of Electronic Information and Electrical

Brief Introduction

This package aims to provide an overview of automatic control and systems engineering in all domains. This package is divided into three parts. In the first part, basic control theories including feedback control systems, process control systems and image processing are introduced. The second part of the package focuses on system engineering, as illustrated in applications such as automation, Internet-of-Things, industrial automation and aerospace engineering. Robotics will be discussed in the last part of the package. In particular, fundamental aspects of applying computer vision and sensing in robotics are provided.

Instructors

Caillan Chen / Professor

Research Interests: wireless sensor networks, internet-of-things and internet-of-vehicles.

Shan Fu / Professor

Research Interests: Intelligent System, Human Factors, Computer Vision/Image Processing and related system development.

Xu Zhao / Associate Professor

Research Interests: computer vision, pattern recognition and machine learning.

Wei Wang / Assistant Professor

Research Interests: System control and optimization, Processing of digital image signal, IT project management.

Yu Qiao / Associate Professor

Research Interests: image processing, pattern recognition and data mining

Wenbin (William) Dai / Assistant Professor

Research Interests: IEC 61131-3 PLC, IEC 61499 function blocks, industrial cyber-physical systems, cloud-based simulation and software architecture in industrial automation.

Hui Xie / Assistant Professor

Research Interests: sensing technologies and medical robots

Jing Wu / Assistant Professor

Research Interests: network-based control systems, smart grid and their applications to industrial problems.

Program Contacts:

Head: Dr. William Dai
Email: w.dai@sjtu.edu.cn

Package 5 Fundamentals and Design of Refrigeration Systems and Heat Exchangers

School of Mechanical Engineering

Brief Introduction

This package discusses refrigeration processes and systems applied in different kinds of refrigeration units, from smaller plants in domestic units and supermarkets to industrial plants in the food and process industry, including the following contents:

- 1) Historical development and importance of refrigeration technology.
- 2) Thermodynamic analysis of different refrigeration processes with special emphasis on thermodynamic losses.
- 3) Properties of working fluids, including their effects on the environment as well as natural and environmentally friendly working fluids.
- 4) Refrigeration system components, including different kinds of heat exchangers.
- 5) Performance analysis of the refrigeration systems and heat exchangers, as well as design optimization for the systems and heat exchangers.

Instructors

Trygve Magne Eikevik (T. M. Eikevik) / Professor

Prof. Eikevik is working in the Department of Energy and Process Engineering, Norwegian University of Science and Technology, with responsibility for energy systems and product quality in the food engineering. His main research areas include Energy Efficiency in Industry, Refrigeration and Heat Pumping Processes and Systems, Chilling, Freezing, Thawing and Tempering of Foods, Dewatering and Drying Engineering, Heat and Mass Transfer in Porous Materials, Thermal Properties of Food and other materials, Insulation Systems, etc.

Haitao Hu / Associate Professor

Dr. Hu holds a Ph.D. in Refrigeration and Cryogenics, with rich research experience in refrigeration systems and heat exchangers. His research area is mainly focused on the heat exchangers, multiphase flow and heat transfer.

Program Contacts:

Pro: Haitao Hu
Email: huhaitao2001@sjtu.edu.cn

Package 6 Chinese Landscape Architecture Studies

School of Agriculture and Biotechnology

Introduction

This package will provide an opportunity to carry out field investigations of Chinese traditional gardens in Suzhou, Hangzhou and the Shanghai area. Simultaneously, by way of literature review, students will learn about the history of Chinese Landscape Architecture, cultural character, art features and genre of Chinese gardens. Secondly, they will explore plant culture and the relationship between aromatic plants and health, ecological ideology and ecological intelligence. Moreover, during the field trip, many typical cases of private gardens, royal gardens and beautiful spots will be analyzed. In addition, students will be required to carry out specific design practice on the culture and art of Chinese gardens. To enhance the students' independent exploration, some distinguished experts will be invited to give talks.

Shengquan Che / Professor

Professor Che is a doctoral supervisor and the Vice Dean of the School of Agriculture and Biology. His research areas include the education and research of landscape ecological planning and design, landscape evaluation and protection, as well as rural landscape.

Yun Wang / Associate Professor

Dr. Wang is from the School of Agriculture and Biology. His research areas are in the culture, history and practice of Chinese gardens.

Dan Chen / Assistant Professor

Dr. Chen obtained her Landscape Planning and Design Ph.D. from the University of Florida. Her major research areas are ecosystem planning, ecological protection and restoration.

Program Contacts:

Jiaoyue Liu
Email: liujiaoyue@sjtu.edu.cn

Dongqin Tang / Associate Professor

Dr. Tang is from the School of Agriculture and Biology. She has an interdisciplinary background of botany, biochemistry, and molecular biology.

Bingqin Yu / Assistant Professor

Dr. Yu is a visiting scholar from the TU Berlin. Her research fields are theoretical research and practical sponge cities, urban community's ecological recreation, planning and design of ecological community, Western modern history and practice of landscape.

Package 7 China's Politics and Global Governance

School of International and Public Affairs

Introduction

This package is consisted of two senior optional courses named "Chinese Government & Politics" and "China & Global Governance." All of the instructors are from the Department of Comparative Politics and International Relations, which is part of the School of International and Public Affairs at SJTU. Through diversified learning forms such as lectures, discussion and fieldwork, international students will learn about both the historical and the current state of China's political culture and political development, from an international as well as a domestic perspective.

Gang LIN / Distinguished Professor

Dr. Lin is the Director of Center for Taiwan Studies, and member of the University's Academic Committee. His research interests include comparative politics, Chinese politics, democratic theory, Sino-U.S. relations, and the Taiwan issue.

Hua ZHENG / Professor

Professor Zheng has researched how discourse power shapes public opinion and influence on foreign policies since 2010. Her research fields include Contemporary Foreign Affairs, Sino-U.S relationship and Political Communication.

Program Contacts:

Head: Bo Peng
Email: bpeng@sjtu.edu.cn

Coordinator: Jingjing Peng,
Email: jjpeng@sjtu.edu.cn

Package 8 Modern Chinese Studies: Shanghai as Eyewitness of China's Development

School of Humanities

Introduction

Whilst China has been undergoing a series of significant changes and challenges since the 1840s, the pioneering role of Shanghai has always been a microcosm of China's developmental process. Telling China's story, from the perspective of Shanghai, to the world would largely reflect on sociocultural changes towards Sino-foreign conflicts, urban development, and literature and life narratives. This package brings together specialists from the School of Humanities in the fields of literature, history and geography in order to advance students' understanding of how China is marching into the 21st century.

Instructors

Chih-yun Chang Distinguished Research Fellow

Ph.D in History, University of Bristol.
Research areas: History of Sino-Foreign Relations, History of Imperialism and Colonialism, and Historical Geography Information System

Jialin Liu / Professor

Ph.D in Comparative Literature and World Literature, Nanjing University.
Research areas: Comparative Literature and World Literature, Life Writing and Translation

Yunxia Wang / Associate Professor

Ph.D in Modern Chinese literature, Wuhan University.
Research areas: Comparative Literature and World Literature, Modern Chinese Literature

Yannan Ding / Assistant Professor

Ph.D in Comparative Literature and Ph.D in Geography, KU Leuven.
Research areas: Humanities Geography, Urban History

Liangdong Guo / Assistant Professor

Ph.D in Modern Chinese Literature, Fudan University.
Research areas: Modern Chinese Literature, Comparative Literature and World Literature, Inter-Cultural Communication

Program Contacts:

Ms. Jingjing Liu
Email: llujingjing@sjtu.edu.cn

Ms. Qiangwei Zhou
Email: rose_zhou@sjtu.edu.cn

Package 9 Advanced Molecular Geomicrobiology: Exploring Theories and Techniques Essential to Un- derstanding Microbial Ecology

School of Life Sciences and Biotechnology

Introduction

Classroom theory-based material and laboratory hands-on exercises will explore the history, development, and application of multiple molecular geomicrobiological procedures central to the characterization of prokaryotic ecosystems. Traditional molecular geomicrobiological protocols such as environmental DNA isolation, PCR sequencing, fluorescence in-situ hybridization as well as special techniques focusing on deep-sea microbial cultivation, including high-pressure incubation and anaerobic techniques, will also be provided. The participants will have the chance to gain a working knowledge of multiple fundamental procedures in molecular geomicrobiology.

Instructors

Fengping Wang / Professor

Professor Wang is one of the pioneers worldwide in understanding metabolisms of uncultivated archaea in the deep-sea environments. Her current working interests include microbial ecology and microbial participated biogeochemical cycles in the deep subsurface biosphere; environmental adaption mechanisms of extremophiles; special metabolic processes and pathways from extremophiles.

Program Contacts:

Jing Tan
Email: tanjing@sjtu.edu.cn

Yanjin Li
Email: liyanjin@sjtu.edu.cn

Heath Mills / Professor

Professor Mills is from the University of Houston Clear Lake, USA. He has over a decade of experience studying Gulf of Mexico ecosystems from a biogeochemical level, focusing on microbial community structure and function in marshlands, shallow shelf sediments and cold seep habitats.

Package 10 Chinese Law and Society

KoGuan Law School

Brief Introduction

This package aims to introduce the students to the study of Chinese law as a developing legal system in its social context. Law, as understood by contemporary lawyers, did not emerge spontaneously in traditional Chinese society. It has only been developed in China as part of the modernization project since the second half of 19th century. Since 1978, in order to initiate and carry out economic reforms, within a short period of time the Chinese Party-State has generated an extraordinary outpouring of laws. However, China has not been widely recognized as a "rule of law" society until now, due to the lack of some key institutional values which are "essential" to such a society. In this package, we shall examine the ways in which Chinese law is shaping and is shaped by Chinese society.

Instructors

Wei SHEN / Chair Professor

Professor Shen got his PhD from LSE and LL.M from University of Cambridge, University of and LL.M & LL.B from East China University of Political Science and Law.

Xiaobing XU / Associate Professor

Dr. Xu got his PhD at Stanford Law School and LL.M at Harvard Law School and Foreign Affairs College in China.

Yan LIN / Associate Professor

Dr. Lin got his PhD at University of Wisconsin Law School and LL.M at East China University of Political Science and Law, M.L.I from University of Wisconsin Law School.

Ge ZHENG / Professor

Professor Zheng got his PhD at Peking University and LL.M of Peking University and Duke University. Professor Zheng is also a Research Assistant Professor at the Faculty of Law at the University of Hong Kong

Wei GAO / Associate Professor

Dr. Gao got her PhD from Law school of University of Bern, Switzerland and LL.M from Germany Heidelberg University school of law.

Package 11 UM-SJTU Joint Institute Summer Program

University of Michigan-Shanghai Jiao Tong University Joint Institute

Introduction

The UM-SJTU Joint Institute Summer Program in Shanghai, China is a 13-week program of engineering and humanities courses taught by Joint Institute and visiting University of Michigan faculty members. Classes are taught in English and follow the University of Michigan curriculum. The program offers students the opportunity to immerse themselves in the Chinese language and culture while earning academic credits towards their baccalaureate degrees. The program includes various cultural excursions in and around Shanghai, the most vibrant, cosmopolitan, and safe city in China.

a. Available Courses:

Please download the course information on <http://umji.sjtu.edu.cn/academics/courses/>.

b. Introduction of Instructors:

<http://umji.sjtu.edu.cn/employees/faculty/>

c. Program Dates:

1. Program Duration: May.12, 2016 till Aug.16,2016
2. Application Deadline: Mar.1, 2016
3. Program Dates for 2015-2016 Summer:
 - May 11th: Early check-in to the dorms
 - May 13th: Airport pick-up (for flights arriving at Shanghai PVG from 06:00am - 12:00am on May 13th)and dorm check-in
 - May 15th: Orientation for International Students (required to attend)
 - May 16th: First day of Class
 - Aug 8th-12th: Final exam week
 - Aug 12th: Last day of Class/exams
 - Aug 14th: Student Departure Date (students are allowed to check-out earlier when they take their last exam or later if they request.

d. Credit: Can take a maximum of 12 credits

e. Fees:

Tuition: RMB 2,500 per credit; Program fee: RMB 4,000 for trips and cultural activities
Accommodation: RMB 25 per night for Double Room on Minhang Campus

Program Contacts:

Viva Du
Email: viva.du@sjtu.edu.cn

Q&A

1.How many packages can I choose?

Each student can only choose 1 package plus the free course of Chinese language learning;

2.How many credits do you provide?

In total 3 credits, 2 credits for one package; 1 credit for Chinese language learning;

Could I transfer the credits back to my home university?

It is a credit program and we provide syllabus, course description, certificate and other materials which help you to transfer to the credit. However, credit transfer varies by university.

4. Where will I live in Shanghai?

SJTU International Summer Session will be provided at two campuses- Minhang campus and Xuhui Campus. All participants in the summer program who have completed the online reservation will have guaranteed accommodations on campus. If your intended package is provided at Minhang campus, then you will have the accommodation at Minhang campus; If your intended package is provided at Xuhui campus, then you will have the accommodation at Xuhui campus.

5. When can I check in if I choose the in campus accommodation?

Applicants who successfully book the reservation can check-in as early as July 1st 2016 and check out as late as August 3 before 12 pm.

6. How can I apply for the visa?

We will provide the admission notice and JW 202 form to you to apply for the visa. For more detailed information please refer to the section of "Visa and Admission".
